PAPER CURRENCY TO BE REFORMED

Plans to Reduce Size of Old Notes by One-third.

WILL EFFECT A BIG SAVING.

Nine Hundred Thousand a Year to the Government and \$200,000 to the National Banks-Also to Have Uniform Design For Each Denomination,

The size of all United States curren cy and national bank notes probably will be reduced by one-third and their designs revolutionized for the sake of economies to the government, convenience to the public and safety against counterfeiting. This decision practically has been reached by the secretary of the treasury, Mr. MacVengh. It is proposed to make the dimensions 6 by 21/2 inches. The paper money now in circulation measures 7.28 by 3.04 inches. The designs of all paper money-United States notes and certificates and national bunk poteswould be systematized and made uniform for every denomination.

This move is expected to save the government about \$900,000 annually and the national banks, which pay for the plates for their notes and part of the cost of redemption, about \$200,-000. The economics would be effected The L. A. S. will meet Aug. 8 with in steel for the plates, in paper and in

For many months the only deterrent to the step by executive authority has been the belief that it would be necessary for congress to appropriate about \$1,000,000 to replace the national bank note plates which have been paid for by the national banks. This problem has been solved by a plan to have the general design of all nettonel bank notes uniform, requiring only one engraved plate for each denomination, and to place on the notes by surface printing the name, location and charter number of the bank. This would

Time Required For Change.

Eighteen months would be required to effect the change by the preparation Newport, who have spent several of the designs, engraving of the pietes weeks with relatives here, returned and printing of the notes. To meet the objection that for a time at least there would be two sizes of currency in circulation it has been suggested that the government print in advance a sufficient quantity of the notes of the new size to be exchanged at the subtrensuries and national banks on a fixed date. The change could be eptetant ally accomplished within a few days, treasury officials believe. There are now nineteen different designs of ourrency. The change would reduce these to nine. Each denomination would be characterized by a distinctively American historical portrait engraved in the center of the note. In time the portrait would be a distinguishing feature of each denomination and would be a safeguard against counterfelling, especially the prevalent practice of raising a note to a higher denomination.

The department is considering using portraits as follows: \$1 note, Washington: 82 Jefferson: 85 Mrs. J. E. Perham, of Niagara, and Cleveland; \$20, Jackson; \$50, Grant;

PHILADELPHIA MINT.

Nearly \$13,000,000 Coined In a Year, Annual Report Shows

During the past year the Philadelphia mint turned \$18,000,000 worth of metal into good fingling money. In addition it coined half a million peece for the republic of San Salvados. This is shown in the ennuel report, which has just been issued.

Inspectors are sent from Washington every year to go over the books at the mint, to weigh the metal on hand and see that the building is overheaded in the search for any gold dust which may be lying around. Scarcely any loss resulted from the handling of the metals this year.

In detail the report of the mint states the values of the various coins made in twelve months: Double eagles, \$2, 606,580; eagles, \$1,041,080; balf eagles, \$1,830,835; quarter eagles, \$890,595; to-Ellis Maudsley of Rileyville, spent tal gold coinage, \$3,360,000; bulf dol-Sunday at his home here. lars, \$904,332.50; quarter dollars, \$1,-Ella Rodenberg, of Rutledgedale, 004,100.25; dimes, \$2,948,068.50; total sliver coinage, \$4,856,565.25; five-cent pieces, \$1.150,388.20; cents, \$900,981.95. The total value of the 120,448,796 pieces coined was \$12,995,025.40.

COLORADO LEADS IN GUNNERY

Twenty Points Ahead of the Delaware on Year's Average,

The final score of all the battleships and armored cruisers in the navy in gunnery for the last fiscal year has been completed. It shows that the Colorado leads, with twenty points intervening between her mark and the next ship, the Delaware. The list is as follows, in the order of standing:

Colorado 11.61 Virginia 17.57 51.43 Ohio ... Deinware 51.43 New Hampshire 25.95 Michigan 29.28 Callfornia 39.28 New Jorney..... 24.63 37.47 Mostnetppt 24.57 Baratoga 37.47 Bouth Carolina. 33.71 South Dakota.. 24.03 Nobraska 23.90 Maryland 30.97 North Dakota.. 80.89 Kansas Louisiana 27.62 Connecticut 27.70 North Carolina, 14.68

The Utah, Rhode Island, Florida, Washington, Vermont, West Virginia, Maine and Idaho did not get into the final score.

BIG POTATO CROP.

Production of 352,000,000 Bushels

Promised-Next Largest on Record. General indications point to a big potato crop this year. On July 1 the condition of the 3,689,000 acres planted was 88.9 per cent. of nor-mal, compared with 76 per cent. last year and 89.3 per cent. for the 19-year average. The indicated yield per acre of 95.5 bushels compared very favorably with 80.9 last year and was slightly below the five-year average of 1906-10 of 96.8 bushels. The indicated production as figured by the Department of Agriculture was 352,000,000 bushels, or next to the largest in the country's produc-

tion record. The largest yield occurred 1909, when the production was 376,-537,000 bushels. The census re-turns gave the yield of that year somewhat higher at 389,195,000 bushels. That year was followed by a yield of 349,032,000 bushel,, after which came the short crop of 1911 and new high prices.

Last year's average price of potatoes at the farm was practically 78 cents a bushel, or an advance of 22.2 cents on the preceding year, amounting to a gain of 40 per cent. in prices. Between February 1, 1911, and February, 1912, Eastern polatoes rose 100 per cent. Last Winter was in many respects the most excessive in the cost of such food products in many years.

Present prospects favor substan-tial relief in this project. High prices during the past year stimulated increase in acreage. The reason has not in all cases been entirely favorable to the grower. While soil conditions have been good, there has been a good deal of wet weather and the season was late in start-Southern supplies are abundant and prices are again more seasonable in retail circles.

MEN MUST NOT DRINK.

Lackawanna Railroad Issues Sweeping Order.

Hoboken, Aug. 6.—Total abstin-ence from intoxicants at all times, whether on duty or off; the regula-tion of leisure hours in the manner that best makes for rest—absolute prohibition, even against visiting sa-loons or other places where liqu r is sold—is the pitch of an order issued by the Lackawanna Railroad

Company to-day.

The order, an outcome of the recent disastrous wreck at Corning, N. Y., applies to all classes of employes directly connected with the movement of trains. It amends rule "G" one of the general rules of the standard code of the American Railway Association. It becomes affective way Association. It becomes effec-

The amendment is as follows, in

"In furtherance of the objects of the seven federal and State hours of service' laws, employes in engine, train, yard and station service are prohibited from using their time while off duty in a manner that may unfit them for the safe, prompt and efficient performance of their respective duties for the company. They are strictly enjoined and required to use their time while off duty primarily for obtaining ample

"The use of intoxicants while on or off duty, or visiting saloons places where liquor is sold, in-capacitates men for railroad service is absolutely prohibited. violation of this order by employes will be sufficient cause for dismis-

General Passenger Agent Geo. A Cullen, speaking of the rule, said that while it has always been against the rules of the company for employes to appear for duty in an intaken to regulate their conduct while off duty is the most drastic in railroad history. He said, further, that the officials of the road had deided on this action when their attention was directed to the ques-tions raised concerning the physical and mental condition of the employes involved in the recent wreck at

Corning. "It has been thought heretofore," said Mr. Cullen, "and is still a gen-eral practice on American railroads, that so long as men avoid the habitual of fiquors when off duty they are reasonably safe, but recent experione absolutely safe course to be fol-olwed by these classes of men, and hat is to abstain altogether from he use of Houor, and that will be the rule on the Lackawanna Rail-

road hereafter. The company realizes that in this pursuing an extreme course, but it ests assured that public sentiment will support its position in view of the great risks involved.

"Quite as important as the sec-ond part of the new rule is the first, although it may possibly not attract as much public attention. It is a well known fact that there are many other forms of dissipation drinking that may tend to unfit men for their duties, and where safety requires men to be alert and keen while on duty it is absolutely essential that they should come to their work refreshened by abundant sleep and in full possession of all their physical and metnal facul-

ERIE IS DRY.

Falling into line with other railroads which have issued orders stopping the sale of liquor on their trains in Jersey, the Erle road has placed the ban on intoxicating drinks according to a letter received by Ed-win I. Stearns, superintendent of the Anti-Saloon League of New Jersey, from R. H. Wallace, general passen-ger agent of that road. The letter states that the road has issued a prohibitory order covering Pennsyl-

vania and New Jersey.

Mr. Stearns wrote letters to the passenger agents of all the railroads operating in New Jersey and has received replies stating that liquor will no longer be sold by them in this state from all of them, except the Lehigh Valley, which has not yet answered his letter.
